## Equipment Repair, Service, Installation & Calibrations & Rapid Breakdown Response

**We have it all covered.**

V-Tech UK over the last 8 years has become the fastest growing Brand name within the Workshop equipment Industry. This has been vastly due to the facility to have the entire nation covered. Having recently invested heavily within after-sales services, whether you need your garage equipment maintained, calibrated or require a service visit through our entire DSP Network, we will always have an experienced and trained engineer near you.

By handling each end every call through our own office you can speak with exactly the team that sell you the equipment and we ensure that you receive the best possible response. With engineers nationwide, dedicated Loan Equipment programs we offer you the simplest solution to get you out of trouble.

We aim to contact you prior to every service visit to ensure minimum downtime and indeed the least possible disruption to your working day. Along with a large stock holding of equipment at our 2 Acre Site based in Essex, we also house a huge inventory of spare parts, consumable, and replacement equipment, and consequently are equipped to offer you a true after-sales service.

For V-Tech Equipment and brands within our portfolio we offer a price promise on 'like-for-like' quotations.

A Huge Range of Services with unrivalled 'affordable' after sales support.

**All with just one simple phone call.**

Through our Service Network we can maintain and service and calibrate a wide range of workshop products equipment including:

- Tyre Changers
- Wheel Balancers
- Exhaust Extraction
- Vehicle Lifts: 2 & 4 Post & Scissor lifts
- Gas Analysers
- Combi Emissions Packages
- Headlamp Aligners Jacking Beams
- Air Compressors
- Lubrication Equipment
- Oil Equipment
- Tyre Pressure Gauges
- Pit Jacks
- Transmission Jacks

All service engineers are trained through our own City & Guilds training facility and know all the latest technology to give you total piece of mind.

## Extended Warranty - Exceptional Prices Affordable Value – Simple! That's where we came from.

We provide installation, warranty and training services for most leading garage equipment brands.

Having clients from every aspect of the industry has made us dynamic in the way we work. Today we look after a national client base consisting of:

- Independent MOT Stations
- Council Workshops
- Dealer workshops
- Fast Fit Workshops alike.

And more importantly, we have assisted several New MOT Project builds handling everything for start to finish.

With a team of fully trained UKAS/SIRA Accredited engineers across the country and being accredited with the GEA, you are looked after by a competent, qualified service team from start to finish.

## Keeping you up and running is our only goal along with keeping you Legal

It is essential that if you are an MOT station, your emission testing equipment must be calibrated to UKAS standard so that you can continue MOT testing. All service engineers are trained and accredited through our UKAS approved laboratory. We take full responsibility for your equipment leaving you to manage your own business without the worry of meeting legislative standards.

### Efficiently Productive – The V-Tech Way.

Being productive is one thing, however, being 'efficiently' productive is the goal.

Less Down Time – Less Down Time & Less Down Time.

Quality Product backed by a Quality Service.

It's Simple!

## Equipment & Support Packages

### Preventative Maintenance

Prevention is always better than cure. We have different types of cover from standard to fully inclusive (includes parts & labour breakdown costs), all designed to keep breakdowns to a minimum and your profits to a maximum.

### Thorough Examination

This cover takes preventative maintenance to the next level as it incorporates a 'Thorough Inspection' by our competent and experienced engineers allowing you to comply with:  
Regulations 9 of LOLER:1998 (Vehicle Lifts)  
Pressure Systems Safety Regulations: 2000 (Compressors)

### Calibration

MOT equipment needs to be calibrated to allow you to continue testing. Our trained and accredited engineers ensure that you are kept legal.

### Breakdown Repairs

Minimum downtime. Maximum profit for you. If you have a breakdown we have a skilled engineer not far away who can help, and with a centralised UK call centre you only need to use one telephone number.

### Equipment Operator Training

Do you want some piece of mind that your employees are adequately trained to operate your equipment safely and correctly to help reduce unnecessary breakdowns.

### New Equipment Advice

Need some equipment? Not sure what you want? Ask V-TechUK. We are more than happy to help.

## On-Site Small Tools Calibration

### For the total garage workshop solution.

#### Quality

Quality is paramount in the services we provide to you and our market leading on-site calibration service is no exception. We can offer comprehensive portable lifting equipment inspection and small tool calibration service through our national network of mobile engineers. An essential part of this service is managing your equipment on our bespoke calibration database. Our system allows us to notify you of the planned visit in advance and ensures that your calibrations are completed on time - every time. Updated certificates are issued giving you total piece of mind.

#### Safety

Accurate and regular calibrations ensure that your critical measurement tools are maintained to the highest standards. Essential for safety critical items such as torque wrenches used for tightening wheel nuts, tyre pressure gauges and brake/engine service tools. Portable lifting equipment such as jacks and axle stands also require maintenance, our LOLER trained engineers are certified to inspect and test to the highest industry standards.

#### Traceability

All certification that we provide you with is fully traceable to national standards and satisfies the requirements of ISO9001, PAS125 and vehicle manufacturers standards.

Our engineers are able to offer replacement tools and equipment whilst on-site from their well equipped vans. Additionally, a wide range of portable lifting equipment and tools can be supplied via our offices.
